Mail Address: DUXBURY CLIPPER, Box 43 Duxbury, Mass.

HOW MANY MINKS IN A COAT?

Do antivivisectionists like stray, unwanted dogs so much they'd rather have them die in a gas chamber than be used to save human lives? Some of the shrillest soprano screeches come from women who wear mink coats, shoes made of cowhide and hats festooned with feathers of butchered birds. Lady, how many minks are there in a coat? Are you saying that it is all right to execute animals so you will look chic but that it is not all right to use animals—stray, unwanted animals—in experiments that will save millions of human lives?

Soon to come before the House is Bill 1101. It would make available UNWANTED CATS AND DOGS for humane scientific teaching and research. Digitalis, like quinine, is used to combat degenerative heart diseases. Thousands of Americans—MILLIONS OF HUMAN BEINGS—wouldn't live a week without this drug. How was its dosage standardized? By testing it on animals. A grain and a half of digitalis is in fact, called a "cat" unit.

How did medicos learn to use insulin, that boon for diabetics, or the X-ray, that mortal enemy of tumors and malignancies, or all those wonder drugs—penicillin, chloromycetin, aureomycin, streptomycin and terramycin? By testing them on cats and dogs. Recent surgery at the Children's Hospital on "blue babies" was first tried on dogs and as a result doctors can operate on congenital types of heart disease. VICTIMS MUST NO LONGER BE CARDIAC CRIPPLES THE REST OF THEIR LIVES. If you give the HEART campaign funds to step up the fight against cardiac diseases, won't you give doctors animals—UNWANTED ANIMALS—for them to use in experiments?

House Bill would require dog officers and pounds to deliver only to licensed medical schools and qualified research laboratories some of the unclaimed animals WHICH WOULD OTHERWISE BE PUT TO DEATH. The bill specifically excludes household pets sent to pounds by owners with a written request for their immediate execution.

Remember that all animal surgery is done under ether anesthesia. IS IT NOT THEREFORE BETTER THAT ANIMALS SCHEDULED TO BE EXECUTED BE USED IN EXPERIMENTS THAT WILL SAVE COUNTLESS HUMAN LIVES?

Write TODAY to Senator Edward Stone and Representatives Nathaniel Tilden at the State House and tell them you ENDORSE House Bill 1101.

Russia apparently had no designs against the U. S. under the Romanoff dynasty. Remember when Seward bought Alaska of Russia for only \$7,300,000? He was accused of "buying a splinter from the North Pole."

HERE AND THERE WITH THE PLAYERS

By JOAN FIELD

"I was very much interested in the 'Playhouse letter,'" writes Mrs. Marshall Johnson (Mary Scully), who is living in New York, where her husband is working for the Pennsylvania Railroad. "It sounds good and should get results. With proper handling, there's no reason why the Playhouse can't be a financial success as well as a social and cultural asset to Duxbury."

Dick Morris is still in California where he will remain for a while, since he has a nice writer-director-actor contract with Universal International. His Studio gave him a \$1000 bonus and a car for Xmas. Lewis Freedman is in TV in New York City. Pat Birch, now in the Garfield "Peer Gynt," was off a European tour with Martha Graham's dance troupe until Miss Graham's illness cut short the tour.

Ken Brooks, living with his wife and daughter, Kathleen, in New York, is at the moment working as a bartender. Bill Pope, who was dancing in Billy Rose's Diamond Horseshoe until he injured his back, will be laid up for six months. Douglas Leonard is assistant director on TV in Boston.

Leonard Roller is in the Army, Travis Childs in the Air Force. Bill Mullikin is in the Chicago company of "South Pacific."

Claudia McNeil was one of the singers who accompanied the Katherine Dunham dancers on a South American tour. John Weaver is with Katherine Hepburn in "As You Like It." Phil Syler is still with Mr. Roberts, now on the road. Bill Dodd, who stage-manages a stock company in the summer, is now in New York. Talbot Ferguson and Jerry Edes (formerly of Plymouth) have been married for over a year, as have Jimmy Broderick and Patsy Kaner.

David Wood is assistant to Han-ya Holm in her New York dance school. Maryann (Field) and Fred Rein are living in Pittsburgh, where he is directing the interracial theatre group, "The Curtainers." He is being investigated by the FBI prior to working for the Voice of America.

THE BIRD STATION

Miss Adele Burgess of Milbrook reports a Loggerhead Shrike at her feeding station. Also known as the "Butcher Bird" it is about nine inches long, gray above and white below a black mask which crosses the eye. A chunky bird with a large head and long tail feathers, the name "Butcher Bird" comes from his habit of killing more than he needs for food, and because he preys on song birds.

He will often fly with his victim to a thorn bush or some sharp object where the little bird will be impaled until the strike is hungry enough to eat it. Strange that the song birds don't recognize the shrike as a killer—that he can mingle with them, as is evident at Miss Burgess' station.

Mrs. Grace Burns of So. Duxbury reports mourning doves at her place. They have been there most of the winter eating the seeds she puts out for them.

Betty Oldham says both male and female cowbirds were at her station Jan. 29. "This is the first time I have seen them so early in the season. They usually appear with the spring birds."

—What have YOU seen?

The Community Garden club of Duxbury met at the home of Mrs. Oliver Barker Friday, Feb. 16 at 10 a. m. Mr. Herman Smith was a guest.

Roy Rogers and his orchestra will provide the music at the Legion Dance Saturday, Feb. 24. This party is in honor of Edward McLeod, who is back in the Navy.

Mr. Edward Turner of Washington St. has been ill with a bad cold the past few days.
